PORTFOLIO

EXPERIENCE

FRONT-END DEVELOPER

Joisto Quertum PL Sp. z o. o. Warszawa | 05.2023 - Present

- Took charge in building a React component library using Storybook, now an integral aspect of the upcoming Joisto version 3.0.
- Developed the frontend of a recently launched Preview Portal app.
- Enhanced sections of the application and implemented more efficient solutions in regards to code and design.
- Expanded my knowledge on coding best practices, accessibility standards (WCAG), and design principles.
- Utilized Figma to develop and propose innovative UI designs.

SOFTWARE DEVELOPER

Automation Industry (Seco/Warwick, Radex) | 2020 - 2023

- Constructed software and intuitive user interfaces (SCADA) to optimize entire processes.
- Offered virtual technical assistance to clients spanning the globe, including China, USA, and Europe.
- Collaborated with diverse client software to develop advanced industrial devices.
- Performed regular maintenance and implemented necessary updates to the current software, while also suggesting potential improvements and increased automation.
